Saifur Rehman

EDUCATION

University of Houston   Aug 2020 - May 2023

B.S. in Computer Science, Minor in Mathematics   GPA: 3.70

EXPERIENCE

FAST Enterprises   Jul 2023 - Aug 2024

Software Engineer   *Lansing, Michigan*

- Developed with .NET Framework in C# and VB.NET to complete numerous client feature requests and bug fixes
- Designed performance optimized SQL database queries to improve data retrieval and manipulation by over 25%
- Demoed new features to clients and stakeholders as part of an iterative approach to help progress development
- Performed rigorous software testing and debugging to ensure the stability of the product prior to deployment
- Refactored and modernized legacy code to refine the product and align it with evolving industry standards
- Partook in weekly stand-up meetings and code reviews to deliver progress updates and receive feedback

TensorIoT   Jan 2023 - May 2023

Software Engineer Intern   *Remote*

- Developed a full-stack mobile application with JavaScript, React Native, HTML, CSS, and multiple AWS Services for scalability and high performance
- Used Infrastructure as Code services AWS CDK and AWS CloudFormation to simplify infrastructure provisioning and streamline the deployment process
- Applied Test Driven Development principles when implementing key features to guarantee a robust application
- Contributed to UI/UX Design via Figma and used Jira for issue tracking along with providing updates on tasks
- Attended weekly stand-up meetings and participated in code reviews to discuss any obstacles or blockers

EAG   Jan 2022 - Aug 2022

IT Intern   *Houston, Texas*

- Completed service tickets and built automated email routine templates with HTML and CSS in ConnectWise PSA
- Troubleshooted and resolved hundreds of OS, server, and network issues within defined service-level agreement
- Managed servers, network, and security with Active Directory, Azure Security, Microsoft 365 Defender, Microsoft Server 2022, and VMWare

PROJECTS

La Habibi Restaurant

- Worked in a team to make a restaurant website where users can create an account, sign in, and make reservations for various party sizes using JavaScript, React, HTML, CSS, and SQLite

Pentagram Safety Solutions

- Won 2nd place on a team at the CodeRED Hackathon for Google quest out of more than 300 participants integrating Google Maps API to provide user coordinates via geolocation using JavaScript, React, HTML, and CSS
